

An invitation from NTNU and NCEI to ITovation, 27 October 2009

The Norwegian Centres of Expertise Instrumentation and NTNU invite you and your colleagues to the next ITovation event on NTNU's Gloschaugen campus, in Auditorium R2, Realfagbygget, on Tuesday 27 October from 3-6 pm. We look forward to an autumn afternoon with lively presentations, tempting food and interesting colleagues.

ITovation will feature its usual mix of presentations on advanced applications of information technology. What are our PhD students and international industries working on? The highlight of this month's event is instrumentation, with presentations on selected approaches from established companies and for future businesses.

We are very proud to announce that this meeting's main speech will be given by Q-Free CEO Øyvind Isaksen and Vice President R&D Hans Christian Bolstad. Q-Free has become a leading global supplier of solutions and products for road user charging and traffic surveillance. A company with approximately 300 employees and represented in 20 countries, Q-Free has become a success in the Intelligent Transport Systems market.

Other invited guests are champions from the wave of successful entrepreneurs who established themselves in the 1980s – come join the discussion with them after the speech!

We will also offer good food, technical art and presentations on innovative businesses that grew out of research at NTNU and the university's PhD students.

ITovation is primarily intended for NTNU PhD candidates and researchers, and industry representatives who are interested in exploring the potential represented by NTNU's research and its young highly skilled people.

For more information and registration see:

www.itovation.org

Please register by 20 October to be guaranteed a place.

Welcome!

Torbjørn Digernes
